ABOUT ME

Game Design and Development student with hands-on experience in gameplay mechanics, level design, balancing, prototyping, and quality assurance. Experienced with Unity and Unreal Engine, with practical experience developing games in collaborative projects and game jams. Interested in creating engaging gameplay experiences and contributing to game development teams through design, level creation, testing, and iteration.

INTERESTED JOB ROLES

Game Designer · Level Designer · QA / Game Tester

EDUCATION

B.Sc. (Hons.) Computer Science & Game Design

Backstage Pass Institute of Gaming & Technology, Hyderabad | Expected Graduation: 2027

PROJECTS

Flux Aeternum

Speedrun / Parkour Game · Unreal Engine · Game Jam · Generalist

- Worked as a generalist on a fast-paced speedrun parkour game developed for a game jam.
- Contributed to game mechanics, sound, and 3D models.
- Collaborated with a 4-member team throughout development.
- Project Link: itch.io/flux-eternum

Project Steel

Top-Down Stealth Game · Unity · Level Designer

- Designed levels for a time-limited stealth game focused on stealing gold while avoiding enemies.
 - Planned room layouts, level structure, and player progression.
 - Designed enemy placement and encounters to shape player movement and decision-making.
 - Focused on level flow, challenge, and how players interact with enemy encounters.
